

PRODUCT CROSS REFERENCE

PRIME COAT PVA DRYWALL PRIMER

Part # PGPC

PRIME-COAT is a ready to use PVA drywall primer that is used between the final finish coat of compound and the application of texture. Using this product will reduce texture variations on "orange peel" applications and promote consistent drying times for "knockdown" applications.

PRIME COAT can also be used as a paint primer as the first complete coat of paint applied in a painting system to an uncoated surface prior to the application of an intermediate coat or topcoat.
